DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a fuel cell mount apparatus wherein said fuel cell mount apparatus has a common part used in common for a fuel cell and an electronic apparatus.

Group II, claim(s) 9-10, drawn to a fuel cell mount apparatus comprising an electronic apparatus having a plurality of drive sections powered by a fuel cell.

Group III, claim(s) 11, drawn to a fuel cell mount apparatus comprising an electronic apparatus having a plurality of drive sections powered by a fuel cell having an electric power supply means.

Group IV, claim(s) 12, drawn to a fuel cell for supplying electric power to a drive section in an electric power supply system.

2. The inventions listed as Groups **I-IV** do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claims 1-12 are linked only in the matter of being "a fuel cell." This is not a special technical feature as can be seen in EP1331679, cited in the IDS, disclosing an electronic apparatus using a fuel cell.

Then, because the special technical feature linking the inventions so as to form a single general inventive concept is not present among the group of inventions described in Claims 1-12, the group of inventions does not comply with the requirement of unity of invention.

Also, with regard to claims 1-11, the groups of inventions are deemed to be linked in the point of being "a fuel cell mounted device comprising a fuel cell capable of generating power by using fuel and air, and an electronic "device having the fuel cell mounted therein and actuated by power from the fuel cell." However, this is no better

Art Unit: 4132

than a technical matter known and commonly used in the field concerned as evidenced by '679 and thus clearly it cannot become a special technical feature.

3. A telephone call was made to William Vaughan on 3/17 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Scully whose telephone number is (571)270-5267. The examiner can normally be reached on Monday to Friday 7:30am to 5pm.
